

NSTC #311

F A L L P R O T E C T I O N

This course establishes an understanding of NASA and OSHA requirements for fall protection and knowledge of systems which can satisfy those requirements. This class will familiarize you with hardware, procedures, and techniques for those who use fall arrest systems.

Topics covered include:

- Preventing falls
 - Aspects of fall protection equipment
 - Tolerance to individual fall protective equipment
- Fall hazard and risk assessment

Who should take this course:

Safety professionals and individuals supervising or working in elevated environments where fall protection is required.

About the Instructor:

Tim Evans, has spent 25 years in the Pulp & Paper Industry with experience in quality, training, safety, forecasting, advising, and planning. Certified in the following: Crane Training Instructor, Scaffold Instructor, Fall Protection Instructor, Forklift Operators Instructor, Department of Transportation in Hazardous Chemicals, Ergonomics Specialist, DACUM Facilitator, ISO 9000 Coordinator, Self Directed Team Development, and TQM Systems. Mr. Evans is Certified by OSHA to teach General Industry and Construction classes. In 2004, he earned his dual General Industry and Construction, Certified Safety & Health Official (CSHO) certificate.
